PROFESSIONAL SUMMARY

Frontend Developer with 1.5+ years of production experience, specialized in React, Next.js, and TypeScript. I build complex interfaces, design systems, and component architecture with a focus on user experience (UX), accessibility, and web performance — backed by the implementation of advanced interfaces for multi-tenant ERP and SaaS platforms. I also have fullstack experience (Node.js, PostgreSQL) that allows me to collaborate smoothly with backend teams.

EXPERIENCE

Fullstack Developer — Kaptan International LLC — Remote January 2025 – Present

Main product: MeteorCloud (ERP for a multi-tenant corporate group)

- Frontend Architecture & Migration:** Key participation in migrating a legacy system interface (CakePHP/jQuery) to a modern, scalable architecture based on Next.js App Router, collaborating on the initial evaluation and selection of the technology stack.
- Complex Components & Editors:** Built a document and report editor with a recursive block tree (drag & drop and resizing) combining Tiptap and dnd-kit. Developed a JSON permissions policy editor, multi-tenant access control, tenant-based visual theme customization, and refactoring of reusable table patterns.
- Product Development & Landing Pages:** Designed and developed corporate landing pages (MeteorCloud and RTM Distribution) and a B2B/B2C order tracking system (Order Tracker) focused on optimizing visual user flows.
- Deployments & Web Optimization:** Configured multimedia asset delivery using AWS S3/CloudFront to accelerate loading speeds and managed frontend deployments using Docker containers on AWS.

Frontend Developer — INEIN — Insurgentes, CDMX October 2024 – November 2024

- Developed and maintained a multi-company web application using Remix.js, React, TypeScript, and Tailwind CSS.
- Built a solid system of reusable modular components, custom hooks, and optimized REST API integration.

ADDITIONAL EXPERIENCE

Teaching Assistant — Henry Bootcamp June 2024 – August 2024

- Provided technical guidance to students on JavaScript and React exercises, mentoring good frontend development practices, layout structuring, and component patterns.

PROJECTS

Galoo — Veterinary Management System (B2B) — Next.js, Express.js, PostgreSQL (Supabase), AWS S3, Vercel

- Fullstack development (architecture, backend logic, and UI) of a SaaS application for veterinary clinics. Implemented a multi-tenant backend, strict role control, automated appointment scheduling and reminders via WhatsApp, and a public digital health record. Created a test suite with over 100 automated tests to ensure system stability and data isolation per tenant.
- AI-Assisted Workflow:** Strategic leveraging of AI-assisted development tools (Claude Code) to accelerate the iteration of complex components, refactor backend logic, and optimize test coverage. Live: [Galoo — Software de gestión para clínicas veterinarias](#)

Ruta Viajera — Booking Platform — Next.js, NestJS, PostgreSQL

- Platform focused on UI/UX for searching and booking travel services, featuring dynamic maps and a fluid, responsive navigation experience. Live: [rutaviajera.vercel.app](#).

SKILLS

- Core Frontend:** Next.js (App Router), React, TypeScript, JavaScript (ES6+), HTML5, CSS3 / CSS Modules, TanStack Table & Query, React Hooks, Context API.
- Styles & UI:** Tailwind CSS, shadcn/ui, Design Systems, Responsive Design, Web Accessibility (a11y).
- UI/UX & Product:** Figma (advanced prototyping, wireframing, UI Kits), User Stories, Information Architecture.
- Backend, Cloud & Tools:** Node.js, Express, PostgreSQL, Supabase, Git, GitHub, Docker (basic/deployment), AWS (S3, CloudFront), Vercel, Agile Methodologies (Scrum, ClickUp).
- AI-Assisted Development:** Advanced use of AI tools (Claude Code) for workflow optimization, codebase structuring, and automated testing.

EDUCATION

- Full Stack Developer (Frontend Specialty)** — Henry Bootcamp (2024)
- Languages:** Spanish (Native) | English (B2)
